Summary

I'm a B.Tech student at Marwadi University. UI/UX and Frontend Developer skilled in creating responsive, user-friendly web and mobile interfaces. Proficient in turning designs into functional, high-performance applications that prioritize usability and visual appeal.

Education

Bachelor's degree in Information Technology Engineering

Marwadi University Rajkot — GPA: 6.76   *Expected 2026*

Diploma in Information Technology

Bhagwan Mahavir University Surat — GPA: 7.45   *2020 – 2023*

Projects

Food Ordering

- Created a detailed food ordering mobile application prototype using Figma. I included **UI/UX** best practices, component-based design, and interactive flows. I built user authentication screens, a menu catalog, cart functionality, a payment interface, and order confirmation pages. This ensured easy navigation and a consistent visual layout.

Music Player

- Implemented a dynamic Music Player application using **HTML, CSS, and vanilla JavaScript**. Integrated an audio playlist with play, pause, forward, and backward functions, dynamic DOM rendering for song lists, and a responsive UI design. Used event handling to manage real-time audio playback and user controls.

Skills

HTML, CSS, Javascript , Node.js, Git, GitHub, OOP, DBMS

Certificates

- **Web & Mobile Projects from Scratch (Udemy)** – Infosys Springboard
- **Figma Training 2022** – Infosys Springboard
- **Web Page Designing With HTML -** HMP Foundation
- **Exploring MS Windows & MS Office -** HMP Foundation
